

BBS-Bioactive Bone Substitutes Oyj

PRESS RELEASE 26.10.2018

BBS' ARTEBONE® product is displayed in the 10 000 years of design exhibition of the National Museum of Finland

The exhibition, focusing on traditional Finnish material culture, novelty of design and high technology, has been opened in the National Museum of Finland. ARTEBONE® product for treatment of bone healing problems and bone defects developed by BBS-Bioactive Bone Substitutes (BBS) is displayed in this exhibition. ARTEBONE® is the Finnish innovation that combines two important properties of bone: calcium based granules as a hard part of bone, and proteins and growth factors extracted from *reindeer* bone promoting new bone growth. The first product of BBS is in paste form in the syringe and is so called ready-to-use product.

10 000 years of design – Man, Matter, Metamorphosis exhibition is open 12.10.2018-24.2.2019 in the National Museum of Finland: <https://www.kansallismuseo.fi/en/exhibitions/10-000-vuotta-muotoilua-ihminen-aine-metamorfoosi>

BBS-Bioactive Bone Substitutes Plc ("BBS") is the health technology company operating since 2003. Before that there was a background of seven years of product development in the University of Oulu. We have developed a new product for healing of difficult bone fractures and for solving the problems in bone healing. Our mission is to offer new generation medicinal products for the orthopedic surgery. The research and development in the field of medicine requires perseverance and courage to develop new things. We have over 20 years of expertise in this. Our operations are characterised by top expertise, innovativeness and dedicated and committed employees. The ARTEBONE® product is ready and the application process for the CE-marking has been initiated. BBS is the company having its headquarters in Oulu. We have our own production plant located in Reisjärvi and it is approved by FIMEA. More information: www.bbs-artebone.fi.
